SecuriSync® by Intermedia

SecuriSync combines real-time file backup with business grade sync and share, plus advanced anti-malware from Sophos to continuously protect your files.

Real-time backup with point-in-time restore	Easy and secure file sharing and collaboration	Mobile access to files from any device	Advanced anti-malware/antivirus to protect against cyber threats like ransomware	Full management and control over data, users, and devices

SecuriSync is an easy-to-use file management service which also helps secure and manage your critical business data. SecuriSync enhances traditional file sync and share by adding real-time backup, advanced anti-malware/antivirus and restore capabilities. It integrates with Exchange, Microsoft 365, Outlook, and existing file servers.

SecuriSync Combines Multiple File Management Solutions into One

Securely Access Content from Any Device

＋

Support Secure, Fast Collaboration Across the Company

＋

Quickly Recover from Data Loss Events with Real-Time Backup and Restore

SecuriSync Features for End Users

ACCESS TO THE MOST CURRENT VERSIONS OF FILES, WHEREVER YOU NEED THEM:

- Files are synced and backed up as soon as a document is modified
- Sync and backup files on Desktop and in Documents, Music, Pictures, Videos and Downloads folders
- Works across Windows®, Mac®, iPhone, iPad, Android, Windows Phone, and BlackBerry devices
- File streaming on demand for complete access to files from Windows Desktop with minimal footprint
- Automatic mobile backup of photos and videos for iOS and Android
- View, create and edit files directly from SecuriSync web*
- Changes made offline are updated as soon as you connect to the Internet

SPEED WORK FLOW WITH EASY AND INTUITIVE FILE AND FOLDER SHARING:

- Share files and folders with co-workers and colleagues inside your company as well as vendors, business partners and customers
- Manage access to folders with flexible, adjustable permission levels
- Co-edit files in real-time with multiple collaborators*
- Replace large email attachments with secure links with the SecuriSync Outlook plug-in
- Manage sharing, collaboration, and versions directly from Word, Excel®, and PowerPoint® with the SecuriSync Microsoft 365 plug-in

SecuriSync Features for IT Administrators

FACILITATE COLLABORATION WITHOUT LOSING CONTROL:

- Manage users, devices, settings, policies, and storage through the HostPilot® control panel
- Get full access to end user content, adjust sharing permissions, and manage files and folders with Admin File Management

- Remotely wipe SecuriSync data from any device, helping to reduce risk of data breaches in the case of lost, stolen or decommissioned devices
- Use File Server Sync to mobilize file server files

COMPREHENSIVE PROTECTION OF CRITICAL BUSINESS DATA:

- Automatic backup of desktop and mobile files helps close gaps presented by other file management solutions
- Use mass restore to quickly roll back to previous versions of a file, folder or multiple folders
- Continuous and automatic scanning of files to protect against advanced cyber threats by quarantining infected files. SecuriSync is integrated with leading anti-malware from Sophos
- Significantly reduce downtime from ransomware attacks, lost or stolen devices, hardware failure, or accidental file deletions
- Files are secured with at-rest and in-transit data encryption and further protected with a unique encryption key for each customer's account
- Comprehensive policy management for devices, retention and access

Why Choose SecuriSync?

- Protect your business from malware with advanced antivirus from Sophos, cited by Forrester Research as a leader in Endpoint Security Suites (1).
- Replace multiple file management solutions with one, for a fraction of the cost
- Integrates with Exchange, Active Directory, Outlook and Microsoft 365
- Facilitates compliance with HIPAA, FINRA and other industry regulations
